Art Unit: 3724

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the abstract, the following portion "accomplished by the rotation of a pair of pinion gears each of which engages a respective rack on the movable rails. The simultaneous rotation of the pinion gears is the result of both pinion gears being secured to a common pinion shaft which is rotatably secured to the machine tool." has been changed to --equalized by a set of cables and pulleys.--.

Within the amendment to the specification received 08 sep 03, after "May 22, 2003," the following has been inserted --now U.S. Pat. No. 6,675,685,--

2. The following is an examiner's statement of reasons for allowance:

Applicant's arguments against the Bartlett reference are agreed with. There are other references, such as Eschenburg et al.'084, that has stationary and moveable rails and a fence that could arguably move beyond the stationary rails. However, when Eschenburg is combined with Waters, the cable is fastened to the moveable rail directly under the fence (as in Waters), and thus the fence would no longer be moveable beyond the stationary rail.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
